

## **Security Management**

### **Security Staff**

We currently staff a total of 12 security personnel in the colony – 2 ASO (1 morning shift, 1 night shift) and 10 Security Staff (5 morning shift, 5 night shift). The security is responsible for managing the security in the colony, manning the boom barrier, manage the water release including the Manjeera valve at the front gate, help with catching snakes, electricity reading in clubhouse for functions, manage the flag hoisting for Independence Day and Republic Day, events related activities as required from time to time and delivering postal mail, turning on/off the street lights etc.

### **Security Reporting**

The security staff should report to the EC team's Security In-charge every morning and evening. The EC team's Security In-charge should sign off on the attendance for that shift. This attendance register is then used by the Treasurer to validate the payment invoice submitted by Ganesh.

### **Security Boom Barrier**

- ☎ Joseph – 9100167748
- ☎ Harsha – 9603222337
- ☎ Ramakrushna (Technical Contact) – 8897686878

The Boom Barrier security system has been installed in the colony. The system comes with a barrier that can be accessed either via an RF card or using a key punch-in. The timer is currently set at 15sec – that is how long the barrier will be open once the access is enabled. 2 RF cards has been given to every resident – if someone has more than 2 cars, access code has also been given to them. There are 2 Admin cards that are also available. In addition to the RF cards and key punch-in, there is a remote that is given to the security and 2 switches at the security post to open and close the barrier. There are an additional 20 RF cards that are available. There is also an inverter that has been specifically installed in the security room for the Boom Barrier system.

### Security Cameras

- 📞 Joseph - 9100167748
- 📞 Harsha - 9603222337
- 📞 Ramakrushna (Technical Contact) - 8897686878

There are 2 security cameras at the front gate – one at the entrance and one at the exit. In addition, we have a security camera facing the neighbouring land – near the wall that was erected earlier this year. We have a HD recorder and a monitor in the security room. We can check the recording if required for up-to 30 days.

Exit Gate Camera

### **Security Gate Access**

The South Gate is typically closed. However, in the case of an absolute necessity, the gate is left open. This ensures that everyone who enters the colony goes through the main gate boom barrier secure system. The South Gate is still accessible for maids and others who come by walk.
